## PROFESSIONAL OVERVIEW

Dedicated IT professional with 3 years of experience in Application Production Support, with foundational knowledge of Linux, System monitoring, and Troubleshooting. Familiar with ITSM workflows and incident management and currently building skills in SRE and DevOps practices. Quick learner with strong problem-solving ability and adaptability to new technologies in shift-based support environments.

## WORK EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS

JAN 2023 - PRESENT

System Performance Monitoring | P1 to P4 Incidents Handling | Incident and SR Creation | Operational Issue Troubleshooting | Service Delivery Support in Global Teams | Monitoring Tools Exposure | Adaptability to New Technologies.

- Monitored system and application performance to ensure operational stability and service continuity. Performed troubleshooting of operational issues to minimize service disruptions.
- Managed incidents and service requests through ITSM tools ensuring timely resolution and communication.
- Troubleshooting and resolving any operational issues or system errors in a timely manner. Maintained detailed ticket documentation and adherence to SLAs.
- Performed first-level fixes including restarting jobs, re-try, connectivity tests, validating configurations, and resolving prod and non - prod environment issues.
- Supported left shift daily operations, Weekly batches, month end and year end activities by following the SOPs.
- Prioritized service level tickets and incidents executed month end and year end activities providing reports to stakeholders ahead of deadlines to support business operations.
- Expertise in Application production support team within the insurance sector, proficiently managing batch processing and resolving job failures promptly by using SQL basic commands.
- Monitored application tools, dashboards, and alerts to proactively identify failures and performance issues.

## PROJECTS

- Developed a Bash-based Linux automation script to monitor disk usage, generate reports, and automatically clean old log files. To improve Linux system maintenance and automation efficiency.
- Bash Network Scanner: Developed a Linux Bash script to perform subnet ping and detect active hosts, using parallel execution and exit status checks for faster network scanning and automation
- Automated disk usage reporting and log management using bash script.
- Technologies & tools: Linux (Ubuntu), Bash Scripting, Cron.
- Built and deployed a Dockerized Flask-based log analyzer with real-time visualization using charts and implemented CI/CD pipeline using GitHub Actions.

## EDUCATION

**Bachelor's degree - BSc IT**

Avinashilingam Deemed University  
Coimbatore. 2019 - 2022

## ACHIEVEMENTS

- Recognized as Outstanding performance and contributions towards the deliverables **Cognizant | Talcott Resolution Team.**
- Recognized with the Cheer Points Award for achieving 100% SLA compliance and ensuring timely Response & Resolution of support tickets. **Cognizant | FRESENIUS MEDICAL CARE NORTH AMERICA Team.**

## PROFESSIONAL DEVELOPMENT

- GCP Associate Cloud Engineer Certification - Udemy
- Oracle Cloud Infrastructure Certified Foundations Associate.
- Python for Support & Automation

## SKILLS

- Linux, Shell Scripting
- GitHub, GitHub Actions
- ITSM, ITIL (ServiceNow/Autosys)
- Monitoring tools, Troubleshooting
- Incident Management / Service request Management
- Networking, SQL fundamentals
- Python
- Basic Knowledge on Azure/GCP
- Kubernetes & Docker
