Professional Summary:

Experienced IT professional with 6+ years of expertise in Windows Server and VMware Administrator within enterprise environments. Proficient in deploying, configuring, and maintaining Windows Server infrastructure, Active Directory services, and VMware vSphere platforms. Strong track record in server patch management, performance optimization, and virtual environment administration. Demonstrates a proactive approach to problem-solving, cross-team collaboration, and maintaining system reliability and security. Committed to continuous learning, technical excellence, and contributing effectively to organizational success.

Skill Set:

Windows and VMware Administrator | Microsoft 365 admin center Azure | Microsoft Configuration Manager | Cloud Azure Admin-L1 | Windows 10 Rollout – L1 | ITIL Ops-L1 | Desktop Support-L1

Work History:

Project: *Firmenich* (Feb 2025 - Present)

Role: ADMINISTRATOR WINDOWS ADMIN - L3 + VMware Administrator

Job Responsibilities:

- Managed and maintained VMware vSphere environments across multiple datacenters (ESXi 6.5/6.7/7.0).
- Performed VM provisioning, cloning, snapshot management, and storage vMotion for production workloads and Migrated VMs between ESXi hosts and clusters with zero downtime using vMotion.
- Conducted ESXi host patching and firmware upgrades using Lifecycle Manager (formerly Update Manager).
- Handled snapshot consolidation warnings and resolved disk lock issues and Involved in server hardware troubleshooting and collaborated with vendors (HP iLO, Dell iDRAC) for hardware alerts.
- Analysed VM performance using vROps and vSphere metrics (CPU, memory, disk I/O bottlenecks).
- Coordinated with storage and network teams to provision LUNs and configure VMkernel adapters.
- Performed backup validation post-VM migration and ensured snapshot cleanup in backup failures.

Project: *AIC, Wipro Technologies* (Oct 2024 – Feb 2025)

Role: ADMINISTRATOR WINDOWS ADMIN - L3

Job Responsibilities:

- Performing Pre-Check, Validating the system compatibility and worked with UniCloud team for Windows Cluster Server Provisioning.
- Creating Failover Cluster in Windows Server 2012 R2, Windows Server 2016, Windows Server 2019, Troubleshooting cluster related issues.
- Monitor the Migration Process, tracking the issues during migration, including failed migrations, data inconsistencies, or system downtime and Ensuring security, and providing post-migration support.
- Configuring document for new environment, including server settings, roles, and network configurations on Windows Cluster and AD servers.
- Server Hardening Completion as per customer requirement.
- Preparing documentation for SIT, UAT, PROD environment and delivered to the customer.

Project: PT XL Axiata Tbk XL Axiata Tower, Wipro Technologies

(May 2023 – Sept 2024)

Role: System Engineer – L3 (Wintel + VMware Administrator + Microsoft 365 admin center Azure)

Job Responsibilities:

- Server Patching and Vulnerability Assessment (VA): Ensuring all servers are up-to-date with security patches and performing regular vulnerability assessments to mitigate risks.
- Experienced in Azure AD, O365 and Generating reports from SCCM to monitor system health, update compliance, and software distribution of supported servers. Security Management and Exchange Online & SharePoint Online, Microsoft Teams Management, Azure AD and DNS.
- Incident and Change Management (CR): Resolving system incidents related to disk space, memory, and CPU utilization while addressing backlog tickets. Creating and managing Change Requests (CRs) for system updates, ensuring proper approval, and documenting changes.

Project: Alcon, Wipro Technologies

(Jun 2020 - May 2023)

Role: System Engineer – L2 (Wintel + VMware Administrator)

Job Responsibilities:

- All task and change related activities should be followed and closing on time. Timely ticket acknowledging and assigning as per SLA and ensure all members are working towards agreed SLA and ticket updating. Proactive identification of repeated incidents, unwanted ticket reduction and coming out with solution. Preparing WSR and MSR for customer review.
- Updating Ticket with Quality updates and following best practices, on time submission of RCA for P1P2 tickets and Creating Knowledge Base Article whenever applicable and provide orientation to new team members, flexibility to working and Updating Pragati once in a month.
- Worked on Service Catalogue Request, CRQ and completing activities with the stipulated SLA.
- Keeping inventory of all computer hardware and software licenses, Managing IT asset lifecycles by decommissioning old systems and installing new ones.

Project: ABB, Wipro Technologies

(Sep 2019 - Mar 2020)

Role: Administrator - L1 (Desktop Support)

Job Responsibilities:

- Technical Support - Assisting with software installations, upgrades, troubleshooting, and setting up new workstations including OS installations, drivers, and required software.
- User Support - Providing first-level support to end-users remotely and responding to helpdesk tickets and escalating unresolved issues to higher-level IT staff. Assisting with user onboarding setting up accounts, configuring email, and ensuring access to necessary applications.

Awards:

- Inspiring Performance – Jan 2022 & Star Performer Award – Nov 2022, Feb 2023

Education:

2023 - MTech in Computer Systems and Infrastructure, Birla Institute of Technology and Science, Pilani.

2019 - Bachelor of Computer Applications, Avinashilingam Institute for Home Science and Higher Education for Women.

Certification & Relevant courses:

- Catapult certified in Windows Server Admin and VMware Server Admin - L1 and L2.
- Attended WorkshopPLUS Remote - Windows Server 2022 and Azure Hybrid Features.
